

FOR IMMEDIATE RELEASE:

## Sudenga Industries Introduces New Bulk Seed Tender

George, IA December 22, 2004 Drawing on over 20 years of bulk seed handling experience, and over 50 years of bulk material transport equipment manufacturing experience, Sudenga Industries of George, Iowa is proud to introduce a new Bulk Seed Tender, the Backsav'r II. A wealth of innovative features set the Backsav'r II apart, making it a true timesaver during planting season.

Features include:

- The Backsav'r II easily holds 200 bushels of seed in two compartments (267 cu. ft of total space), with independent gate controls for each compartment. Compartments are sealed with two steel roll top lids or optional roll-tarp top.
- The innovative stowing conveyor design allows the Unload Conveyor to fold flat, out of the way, to the side of the tender box when not in use. The Backsav'r unit and stowing conveyor measures just over 18 feet long with the Conveyor in the stowed position and under 12 feet high (when mounted on the Sudenga transport). The Conveyor is readied to unload quickly and simply by pulling the Stow Handle and turn the Positioning Crank.
- Gently unload up to 900 lbs per minute with patented cleated belt technology. The Conveyor has been sized to reach the tallest of the new central seed container planters and drills, and reach up to 50 feet of total side-to-side length with the swinging conveyor combined with the three-piece telescoping spout. The Conveyor is constructed of galvanized steel and includes a standard wind skirt for safety.
- A 5.5 HP Honda gas engine with electric start, onboard battery and variable flow control switch, powers and regulates the flow of seed from the Conveyor.
- Order the Tender from the factory mounted on its own heavy-duty, 14,000 pound Transport with dual electric brakes and adjustable hitch. Add the optional weigh scale configuration with the roll-tarp top, or purchase the unit without the Transport for mounting on an existing trailer.

Patent application is in process for certain portions of the design of the Backsav'r II. For additional information, or photos pertaining to the Backsav'r II Bulk Seed Tender, contact: Greg Ver Steeg by phone at 1-888-783-3642 or by fax at 1-712-475-3320. Write to Sudenga Industries at 2002 Kingbird Avenue, P.O. Box 8, George, IA 51237 or e-mail us at [sales@sudenga.com](mailto:sales@sudenga.com).

Sudenga Industries was founded in George, IA in 1888 as an Iron and Woodworks shop providing area farmers with shoes for their horses and replacement wagon parts. Sudenga Industries' first mass-produced product came in the 40's, with the introduction of a rear end loader for the Ford Ferguson Tractor. Since then, Sudenga Industries has grown to-be recognized as a leader in the design and manufacture of high-quality, innovative grain, feed and seed handling equipment for farm and commercial use.
