

## **FOR IMMEDIATE RELEASE:**

### **New Bulk Feed Transport Handles Feeds with Bridging and Flow-ability Problems**

George, IA November 3, 2004 Sudenga Industries, Inc. of George, Iowa introduces the new Max-Flow model to its line of bulk feed transports. Engineered to efficiently handle bulky feeds with a tendency to bridge, Sudenga's new Max-Flow bulk feed transport features an unload system design which promotes consistent, trouble free unloading, even in feeds that have by-products with poor flow-ability characteristics.

The Max-Flow's unique unload system eliminates the standard "inverted vee" to provide an unobstructed path to the unload auger located beneath each feed compartment. Specially designed, 17-inch wide, horizontal gates open from the center and are engineered to function easily under load. Rack and pinion gears on each gate ensure equal tracking.

Sudenga Bulk Feed Transports boasts some of the fastest unload rates in the industry, with 2500 pounds per minute. Unloading rates are maintained in the Max-Flow line with larger vertical outlet and discharge inlet. The "free wheeling auger" condition often associated with slanted vertical auger systems is eliminated with Sudenga's true upright vertical auger. The vertical auger connects the auger(s) located under the Transport's feed compartments with the auger, which swings to fill storage bins.

The Max-Flow model from Sudenga Industries, Inc., is available for straight trucks to 20 tons in Standard or EZ Fill, aluminum body configurations.

For additional information, pricing or photos pertaining to the Sudenga Max-Flow bulk feed transport, contact: Doug Tecken by phone at 1-800-314-3908 or by fax at 1-712-475-3320. Write to Sudenga Industries at 2002 Kingbird Avenue, P.O. Box 8, George, IA 51237.

Sudenga Industries was founded in George, IA in 1888 as an Iron and Woodworks shop providing area farmers with shoes for their horses and replacement wagon parts. Sudenga Industries completely entered into manufacturing in the late 40's, with the introduction of a rear end loader for the Ford Ferguson Tractor. Since then, Sudenga Industries has grown to-be recognized as a leader in the design and manufacture of high-quality, innovative grain, feed and seed handling products. Sudenga Industries continues to grow, with an ever-expanding product line and customer base. Owners and employees alike maintain a proud tradition of customer service and commitment to quality.
